

Waterproof Camera Housing for Raspberry Pi cameras

Dustproof and waterproof camera housing for Raspberry Pi cameras

This is a camera housing set compatible with Raspberry Pi cameras.

It includes all necessary components—such as a mounting base and cables—for installing the camera inside the housing, allowing the system to be used immediately by simply preparing the camera.

What's included

- 1 x Camera housing
- 1 x Dome window and flat window for the housing
- 1 x Camera mounting parts (mounting plate and spacers)
- 1 x CSI conversion module (HDMI or Ethernet)
- 1 x Cable with cable gland
- 1 x Vent filter seal

Compatible with all Raspberry Pi cameras.

Please note that for Raspberry Pi AI cameras, some functions may be limited depending on the combination with the conversion module used.

Cameras from manufacturers other than those listed above can also be integrated. We can also design and manufacture custom mounting plates and related components. Please feel free to contact us for consultation.

Cable with cable gland

This is a special cable equipped with an IP68-rated cable gland, with the cable pre-installed through the gland. It can be used with the camera housing without any cable modification, allowing for easy and reliable installation.
