Add a Viewing Window to Sealed Enclosures
Waterproof Dome Covers & Flat Windows

These dome covers and flat windows can be installed on waterproof enclosures, allowing visual inspection of internal equipment and image capture using cameras. Designed for integration with industrial cameras, sensors, and optical equipment, they are suitable for a wide range of applications, including outdoor monitoring, industrial equipment, and research and development.

Features

Customize Existing Enclosures with Waterproof Windows

The Waterproof Dome Cover is a DIY waterproof window component designed for installation on waterproof enclosures, junction boxes, and similar cases.
It allows cameras, measuring instruments, and other equipment to remain protected inside the enclosure while enabling image capture and visual inspection without opening the case.
By modifying existing enclosures, you can create customized waterproof camera housings and equipment enclosures tailored to your specific applications.
